

Splenektomili vs Splenektomisiz

JCOG1809 (LTG-SPRING-P11)

Upper third gastric cancer **with greater curvature invasion (T2-T4a)**

Laparoscopic or robotic TG with splenic hilar LN dissection

Completion of LTG or RTG

Intra operative complication

Conversion to open TG

Primary endpoint:	Pancreatic fistula and/or intra-abdominal abscess (CD \geq Grade III)
Secondary endpoint:	Blood loss, operation time, morbidity, # of harvested #10 LN, # of metastasis in #10 LN, conversion rate, proportion of splenectomy, relapse-free survival, overall survival
Sample size:	85 pts.

Pancreas-preserving surgery
