# Korean Practice Guideline for Gastric Cancer 2018: an Evidence-based, Multi-disciplinary Approach

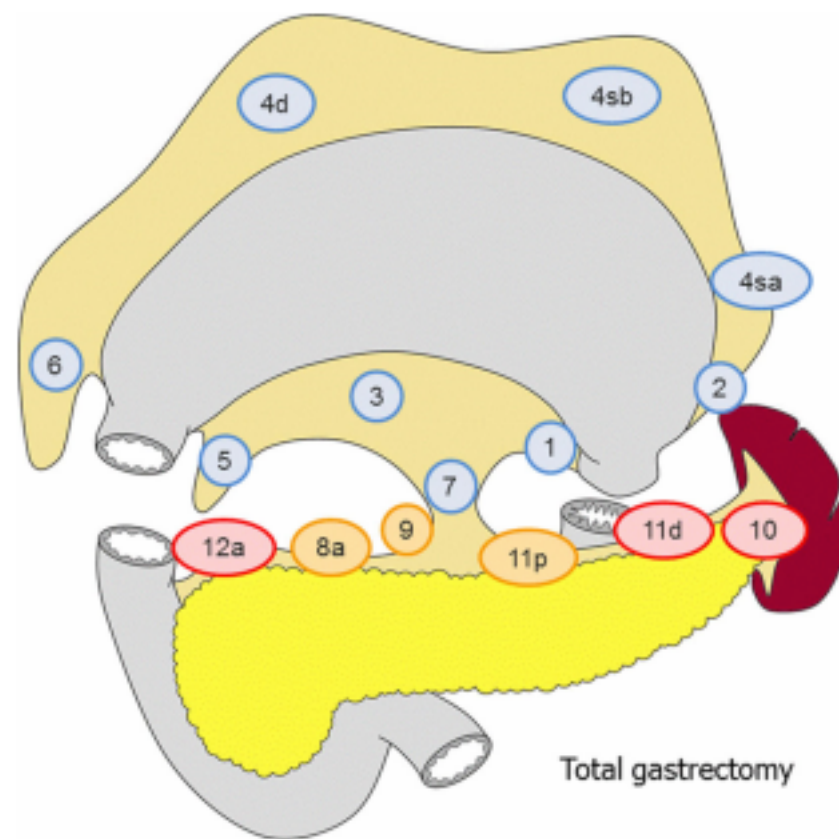

S11. Laparoscopic surgery is **recommended in early gastric cancer** for improved postoperative recovery, complications, quality of life, and long-term survival (evidence: high, recommendation: strong).

Statement 12. Laparoscopic gastrectomy **could be performed** for advanced gastric cancer in terms of short-term surgical outcomes and long-term prognosis (evidence level: **moderate**, recommendation: **weak**).
